

National Domestic Preparedness Coalition

Threat, Risk, and Vulnerability Assessment Course Homeland Security Comprehensive Assessment Model (HLS-CAM)

The HLS-CAM™ was developed “by First Responders for First Responders”

Companies that have sent employees to the HLS-CAM trainings

The HLS-CAM™ is a comprehensive threat, risk, and vulnerability assessment methodology that defines a community, evaluates its strengths and weaknesses, identifies critical infrastructure and key resources (CI/KR), identifies the threats to the community, prioritizes (CI/KR) and provides a comprehensive vulnerability assessment to assess facilities, infrastructure and events. The HLS-CAM™ was the first methodology of its kind, integrating assessments and prioritizing the order in which critical facilities and infrastructure were assessed.

Below is a list of the latest attending agencies and companies that have sent multiple representatives to the recent HLS-CAM trainings.
